9:18am, Weds, Oct 7, 2015 by CJ

**Good Morning**

9:19am, Weds, Oct 7, 2015 by Sandra

**Is it because God made it that way?**

9:24am, Weds, Oct 7, 2015 by Glatma

**Glatma that is a possibility**

9:25am, Weds, Oct 7, 2015 by Zmuda

**Sky is blue because molecules in the air scatter blue light from the sun more than they scatter red light.**

9:25am, Weds, Oct 7, 2015 by Nikki

**The sky is blue because of the gases in the atmosphere reflecting light**

9:25am, Weds, Oct 7, 2015 by Lori

**A clear cloudless day-time sky is blue because molecules in the air scatter blue light from the sun more than they scatter red light.**

9:25am, Weds, Oct 7, 2015 by April

**Sometimes it's not blue.**

9:25am, Weds, Oct 7, 2015 by Carla

**sunlight passing through the atmosphere**

9:25am, Weds, Oct 7, 2015 by marc

**Blue light waves are shorter and travel faster than other colors in the spectrum, which is why we see blue skies the majority of the time.**

9:26am, Weds, Oct 7, 2015 by Lori

**sky is blue because molecules in the air scatter blue light from the sun more than they scatter red light.**

9:26am, Weds, Oct 7, 2015 by Mary

**combination of blue and red lights**

9:26am, Weds, Oct 7, 2015 by Joy

**We collaborated as a table to produce one answer. Shorter wavelength blue light is more strongly visible than longer wavelength red light.**

9:26am, Weds, Oct 7, 2015 by KATLIN

**NASA says it is the reflection and bending of light. More blue during the day. Red and Orange in**

**the evening the blue light is scattered.**

9:27am, Weds, Oct 7, 2015 by CJ

**The sky is blue because of molecules in the air scatter more blue light than red light**

9:27am, Weds, Oct 7, 2015 by Wandaleen

**A clear cloudless day-time sky is blue because molecules in the air scatter blue light from the sun more than they scatter red light.**

9:27am, Weds, Oct 7, 2015 by Amanda

**light from sun enters our atmosphere and collides with molecules in the air**
